

SPECIFICATION AMENDMENTS

Please amend paragraphs 0001, 0003, and 0022 of the specification as follows:

[0001] This application claims the priority of application number 10254108.6, filed in Germany on November 20, 2002, the disclosure of which is expressly incorporated by reference herein.

[0003] The subject matter of this application is related to commonly assigned applications application serial nos. 10/716,942; 10/716,941; and 10/716,943, filed herewith and based on respective German application nos. 10254130.2; 10254131.0; and 10254132.9.

[0022] Figure 3 illustrates how, by means of a rearward roof wall extension 33, the roof element 13 projects beyond a groove 34 of the rollover bar system 8 and, by means of a first sealing section 35 and second sealing section 36, extends to the ~~groove 24~~ groove 34 and the rollover bar system 8. In this case, the first sealing section 35 is provided between a free end 37 of the roof extension 33 and an upright wall 38 of the rollover bar system 8. In contrast, the second sealing section 36 is operative between an interior wall 38 of the roof extension 33 and a wall 39 of the groove 34 aligned in the direction of the roof extension 33.
